WASHINGTON, D.C. 20268-0001

MAIL CLASSIFICATION SCHEDULE

Docket No. RM2011-8

COMMENTS OF UNITED STATES POSTAL SERVICE
(March 24, 2011)

On February 7, 2011, the Commission established this proceeding to consider modifications to the Commission's rules governing the Mail Classification Schedule. Order No. 666 (February 7, 2011). The Commission requests comments, by March 24, 2011, on these modifications, which include detailed text for the Mail Classification Schedule, based to some extent on product descriptions provided earlier by the Postal Service in Docket No. RM2007-1. The Postal Service provides the following comments.

The Postal Service is filing with this pleading a marked up version of the Commission's draft MCS, reflecting its proposed changes. A brief explanation of all but the minor corrections is provided below.

Rule Changes

The Postal Service generally is fine with the rule changes proposed in Order No. 66. The Postal Service is concerned about the change to Rule 3020.12(b), which eliminates the language about availability of previous issues of the MCS. The Postal Service has often needed to know how the Domestic Mail Classification Schedule (DMCS) read in prior years, and has used the versions printed in the Code of Federal

Regulations (CFR) and in some omnibus rate case decisions as sources. Publishing the MCS in the CFR, or retaining old versions on the PRC website annually, would be valuable. It is difficult to reconstruct a previous section of the MCS from Federal Register notices, especially if one cannot review old versions of the MCS to determine the time period in which the language for a specific product changed.

Intellectual Property

The Postal Service has updated the Trademark Notice on page ii of the draft MCS, to include the following trademarks: Confirm[®], Delivery Confirmation[®], DPV[®], Intelligent Mail[®], NCOA^{LINK®}, PostalOne![®], and ZIP+4[®]. Stamped Stationery is removed from the list, and a few other items on the list are marked with [®] instead of [™]. The note at the bottom of the Trademark Notice has been shortened.

The Postal Service also recommends adjusting some MCS language to avoid compromising these trademarks. Thus, “postal services” is changed to “services” in the description of Optional Features, in sections 1105.4, 1110.4, 1115.4, 1120.4, 1125.5, 1130.5, 1205.5, 1210.5, 1215.4, 1220.4, 1225.4, 1230.4, 1305.5, 1310.5, 1405.5, 1410.5, 1415.5, 1420.5, 2105.5, 2110.5, 2115.5, 2120.5, 2305.5, 2310.5, 2315.5, 2320.5, 2325.5, 2330.5, 2510.3.5, 2510.4.5, 2510.5.5, 2510.6.5, 2510.7.5, 2510.8.5, 2515.4.1, 2515.4.2, 2515.4.5, 2515.5.4, 2515.5.5, 2515.6.5, 2515.7.5, and 2515.8.5. The word “postal” is not needed in that context, and its elimination avoids confusion with the trademark “Postal Service.” Trademarks are intended to be descriptive, so “ZIP Code” is changed to “ZIP Code number[s]” in sections 1230.5 (last paragraph) and 1515.1 (DMM Labeling Lists and Five-Digit ZIP), and “Post Office Boxes” is changed to “Post Office Box receptacles,” in sections 1550.1(d) and 2640.1(d). References to

PostalOne! are changed so they describe a system, in section 1205.6 (Saturation and High Density Incentive Program). In sections 2610.1 and 2635.1, “postal retail locations and online postal stores” is changed to “postal retail locations and websites,” to avoid any conflict with the trademark “The Postal Store.”

First-Class Mail

For First-Class Mail, the Machinable Letters and Machinable Postcards price categories are clarified as being nonautomation and presorted, in section 1110.3. In section 1110.5, the maximum weight for machinable letters is corrected to 3.3 ounces. In section 1115.1, the minimum weight is clarified to exclude 3.5 ounces. In sections 1115.2 and 1120.2, the minimum volume requirements are clarified to indicate that the minimum pertains to all Presorted mail, rather than the mail in each of the presort categories. In section 1120.1, the maximum size for ADC, 3-Digit, and 5-Digit Parcels is restated in terms of combined length and girth, rather than specific maximums. A minimum thickness is added for keys and identification devices. In section 1120.5, the prices for keys and identification devices are corrected, consistent with DMM 101.

While the Reply Rides Free description in section 1110.5 is fine as of December 31, 2010, the Postal Service suggests updated language in item (d) of the description, to best reflect the changes approved in Docket No. MC2011-20 (Order No. 685 (February 28, 2011)). An exception until May 1, 2011 is no longer needed now that the full-service Intelligent Mail option is not required.

Standard Mail

In section 1200.1(b), “enclosure” is corrected to “closure.” Under part (a) in the “Nonprofit only” section, the language is clarified. In sections 1205.2, 1210.2, 1215.1,

and 1220.1, the maximum weight is specified at less than 16 ounces, in order to exclude 16 ounces, and consistent with the lack of a lower maximum weight for letters in 1205.2, 1215.1, and 1220.1. Consistent with DMM 243, the prices for saturation and high density letters over 3.5 ounces are added to section 1205.6; these are the same prices as for flats, in section 1210.6. Similarly, the prices for carrier route nonautomation letters weighing over 3.3 ounces are added to section 1215.5; these are the same prices as for comparable flats, also in section 1215.5. Finally, the prices for nonmachinable letters weighing over 3.3 ounces are added to section 1220.5; these are the same prices as for comparable flats, in section 1225.5. These changes provide all the prices for letter-shaped pieces without reference to the prices for flats.

In section 1210.2, the title for the third table is simplified. In section 1215.5, two of the per pound prices for carrier route flats are corrected. In section 1220.5, another price is corrected in the first table, and a reference to “automation” letters is added after the tables. In section 1225.1, the minimum height for Customized MarketMail pieces is corrected. Similarly, in section 1230.1, the maximum length for Not Flat-Machinables is corrected.

Periodicals

In section 1300.1, the reference to “newspaper” is considered redundant, and is removed. “Within County” is changed to “In-County” in many places, to be consistent with the DMM and other postal publications. In section 1305.1 the description of In-County Periodicals is simplified and made more accurate.

Package Services

In the old Domestic Mail Classification Schedule, the Parcel Post subclass consisted of several rate categories, including “Bulk Parcel Post.” Now that all the bulk options are included in the Competitive part of the MCS, the Postal Service recommends that “Single-Piece Parcel Post” be renamed “Parcel Post.” That change is marked throughout the draft MCS.

In section 1400.1(d), on forwarding and return for pieces combining Package Services mail with First-Class Mail or Standard Mail pieces, an “as specified in the Domestic Mail Manual” is added because of the detailed specifications involved. In sections 1405.5 (as well as other places in the draft MCS), Pickup on Demand service is made singular because only one service is involved. In sections 1415.4 and 1420.4, “Zone-Rate Nondestination Entry” is substituted for “Zones 1-8” as a more appropriate price category name.

Ancillary Special Services

For Address Correction Service, the last sentence in section 1505.1.1(e) is deleted, consistent with DMM 705.23.4.2. In section 1505.2.1, the Periodicals paragraph is clarified with a couple of changes, and the Package Services paragraph adds the word “separate” to make it clearer that there are separate mailing fees for Media Mail and Library Mail. Permit Imprint “Authorization” is changed to “Application” to make it clearer that the fee is a one-time fee paid at the time of application.

The language in section 1505.3.1(a) is simplified. An exception for Critical Mail also is added to this section, along with sections 1505.5.1(a), 1505.6.1(b), 1505.10.1(b), 1505.13(b), 1505.14.1(b), 1505.15.1(b), and 1505.18.1(a). In section 1505.3.2, the Bulk

Weight Averaged Account Maintenance fee is corrected. In section 1505.6.2, “pieces” is added for trademark reasons, and the applicability of the bulk prices to Priority Mail and Package Services pieces is specified. In section 1505.7.1, language is clarified, including substitution of “missing contents” for “rifling” (consistent with recent changes to DMM 503.1 and 503.4), and of “delivery address” for “mailing address.” In sections 1505.9 and 1505.12, the language is clarified, including the substitution of “missing contents” for “rifling”, and “delivery address” for “mailing address.” The second Description paragraph in section 1505.9 applies only to General insurance, and is therefore moved down to that section. The section 1505.16.1(a) language is clarified, and corrected to indicate availability for Package Services and Parcel Select pieces. In section 1505.19.2, “for 500 envelopes” is deleted after “4-color logo”, since this section is already limited to orders of 500 envelopes.

Address Management Services

In section 1515.1 (Address Management Services (AMS) Description), the entries for Barcode Certification and Official National Zone Chart software are not currently available, and have not been available for several years. They were erroneously proposed for addition to the MCS, but should not be included, and thus are marked for deletion from the draft MCS.

MASS IMb Testing, on the other hand, was omitted from last year’s AMS proposal, but is a current offering. One of the fees for FastForward MLOCR (a \$2600 audit fee) was omitted from earlier filings. The one-half fee for MASS recertifications related to system moves, transfers, or upgrades also has been omitted. For NCOA^{Link} Service, the listed ANKLink fee is for One Site only. The listing should be in the same

format as Limited Service Provider, with a price for One Site only, and a separate listing of half that price (\$1750) for each additional site. All of these changes therefore are marked for addition to the draft MCS, in section 1515.1.

The listing for AIS, also in section 1515.1, is corrected to indicate that AIS is an acronym for Address Information System, rather than Service. The description for NCOA^{Link} service mentions “five type of licenses“, but then describes six types of licenses; “five” is therefore changed to “six.” The heading for section 1515 is corrected from Address List Services to Address Management Services.

In section 1515.2, the prices for AIS are supplemented to show the availability of Single Issue pricing. The fees for many services are marked with an asterisk, and they are clarified to indicate that they provide an annual subscription. The AMS Price Table for Additional Copies is supplemented to show that, for these services, single issues are available for 66 percent of the annual subscription fee. This table is renamed AMS Price Table for Single Issues or Additional Copies. A similar reference is added for TIGER/ZIP+4 service in Address Enhancement Services (section 2605.2). Finally, Z4Change is added to the list of services for which unlimited copying is available for a \$10,000 fee.

Confirm Service

In section 1530.1, “Confirm Service” is changed to “Confirm service,” consistent with the trademark for Confirm. A sentence is added to section 1530.1(e) to describe the annual offering for additional ID codes.

Money Orders

In section 1545.2, “DPO” is added to “APO/FPO” to show the availability of money orders at Diplomatic Post Offices.

Post Office Box Service

Sections 1550.1 and 2640.1 are clarified, and “Post Office Boxes” is changed to “Post Office Box receptacles,” consistent with trademark practice.

In Docket No. MC2010-20, the Postal Service omitted one of the ZIP Codes for the McLean, Virginia Post Office. In addition to ZIP Code 22101, ZIP Code 22106 should be specified, and is added to the draft MCS in section 2640.1(f).

Priority Mail

Certified Mail is added as an available special service in section 2110.5.

Pricing for Selected Competitive Services

The Post Office Box Service prices for key duplication or replacement and lock replacement, the refundable key deposit, and the Pickup on Demand charge apply to both market dominant and competitive products (Post Office Box service, which is market dominant in some locations and competitive in others, and, for Pickup on Demand service, Parcel Post, which is market dominant, and Express Mail, Priority Mail, and Outbound Priority Mail International, which are competitive. The Postal Service wants a uniform price for each of these services, plus the key deposit, with implementation of any changes on the same day for both the market dominant and competitive applications. Having different prices for the market dominant and competitive products would cause employee and customer confusion, especially for

Pickup on Demand service, which can apply to both market dominant and competitive pieces at the same stop.

Filing both market dominant and competitive cases on a similar schedule, so that these prices change on the same date, is burdensome, and difficult to coordinate, for the Postal Service Governors and staff, and for the Commission. The Postal Service therefore proposes a more efficient regulatory process, by specifying these few competitive prices by reference to the market dominant prices. The Postal Service would then change these prices through market dominant filings, and the competitive prices would change simultaneously (without the need for an extra MCS change).

Multiple Classes

In section 1115.1, 1125.2, 1210.2, 1215.1, 1225.1, and 1415.2, the minimum size specification is corrected to indicate that one of the dimensions must exceed a measurement, rather than “meet or exceed” the measurement. In addition, throughout the MCS, most references to “rates” are changed to “prices,” reflecting current DMM usage; “flat-rate” is not changed.

International Products

The marked up version of the Commission's draft MCS filed with this pleading includes a number of changes concerning both market dominant and competitive International Products. These changes and the rationale for each of them are included in Appendix A, entitled "Proposed Changes to the International Product Sections of the Commission's Draft MCS."

Glossary

Diplomatic Post Offices (DPOs) are added to the definition of APO/FPO, since these offices serve a similar function. The definitions of Basic, Basic Carrier Route, Carrier Route, Girth, Minimum Size Standards, Mixed ADC, Mixed AADC, Permit Imprints, Qualified Business Reply Mail, and Zone have been clarified. The items for Inter-NDC and Intra-NDC have been deleted because they are outdated, and not used elsewhere in the MCS. A definition of the term Single-Piece has been added.

Conclusion

The Postal Service is pleased that substantial progress has been made on issuing a comprehensive Mail Classification Schedule. The Postal Service understands that this MCS is updated through changes approved through December 31, 2010, and that the Commission plans to update the MCS for later changes before it issues the MCS. While the Postal Service would like to review the updated MCS before its issuance, so that further feedback can be provided, the Postal Service understands that the Commission may not find this practical. If necessary, the Postal Service will put forth additional MCS changes through separate Commission proceedings. The Postal Service therefore supports the issuance of an MCS, reflecting the Postal Service's comments in this pleading and the attached MCS document.

Respectfully submitted,

SECTION	PROPOSED CHANGE	RATIONALE
